MARKET REVIEW

September 2021

Equity Commentary:

India Market Updates

After reaching record highs during the September month, Nifty-50 index fell slightly by 2.8%, as global markets also consolidated a bit. Market sentiments got a boost as the US Fed stated that it is not in a hurry to raise rates even after they taper their asset purchases, the Gol announced a slew of reforms: PLI (Production Linked Incentive) schemes for auto, drone and textiles sectors, a relief package for telecom sector & further steps towards formation of a bad bank, Covid-2019 cases continued to decline in India and pace of vaccination picked up. However rising US bond yield, surge in crude oil prices, fear of contagion from China's property giant Evergrande (the world's most indebted developer) and ongoing debt ceiling debate in the US weighed on sentiments. Meanwhile, a deal to avoid a government shutdown in the US, central bankers assurances about the transitory nature of inflation and reassurance over the rise in bond yields and People's Bank of China's \$17 billion injection into the banking system prevented investor mood from turning extremely sour.

The performance of the eight core sectors has been strong in August 2021 with 11.6% growth led by strong growth in coal, natural gas, cement and power sector. The cumulative index for the first five months of FY22 was higher by 19.3% YoY, however the growth was lower by 1.3% when compared with the index for the same period in FY20. Manufacturing PMI rose to 53.7 in September from 52.3 recorded in August, highlighting a stronger expansion in overall business conditions.

In a much-awaited relief, the GoI, approved the reforms for telecom sector through which the liquidity woes of the telecom sector have been addressed to a large extent. Moratorium up to four years in payment of Adjusted Gross Revenue (AGR) and spectrum dues is expected to free up cash of about Rs 45,000 crores annually for the telecom players along with release of Bank Guarantee (BG) limits aggregating ~ Rs 30,000-32,000 crores. Also BG requirements towards License Fee & other levies has been reduced and 100% FDI is now allowed. For the players now the real litmus test will be their ability to raise tariffs in the near to medium term.

Gol approved the PLI scheme in auto and drone industries with the total allocation of Rs 26,060 crores. The scheme is expected to generate employment opportunity for over 0.7mn in the auto sector and provide an investment opportunity of over Rs 42,500 crores in the next 5 years. PLI scheme for drones will result in fresh investment of Rs 5,000 crores in 3 years and incremental production of Rs 15,000 crores.

The validity of ECLGS scheme has been extended till March 31, 2022, from September 30, 2021, or till Rs 4.5 lakh crore is sanctioned. Disbursements are allowed till June 30, 2022. This is the fifth extension since its launch in May' 20. Since its inception, ECLGS has extended relief to over 1.15 crore MSMEs and businesses and as on September 24th, 2021, loans sanctioned have crossed Rs 2.86 lakh crores.

India's merchandise exports rose to \$33.3 bn in August 2021 witnessing a robust growth of 45.8% YoY. Merchandise imports during the month inched up to a 5-month high of \$47.1 bn, up 51.7% YoY. India's cumulative merchandise exports stood at \$164.1 bn during the first five months of FY22, highest level since FY18 (April-August period). Cumulative merchandise imports were at \$219.8 bn in FY22 close to the pre-pandemic level of \$218.9 bn and \$210.4 bn in FY19 and FY20 respectively. On a cumulative basis the healthy growth in exports has helped restrict India's trade deficit at \$55.6 bn (lowest since FY18). The Gol has undertaken several measures to promote competitiveness of Indian exports.

The Gol's finances continued to show healthy and upbeat trend for the first five months (April-August). Fiscal deficit touched 31.1% of the annual target at end of August and was significantly lower than the last year's figure of 109.3% for the same period. Stronger-than-expected tax and non-tax collections coupled with calibrated expenditure so far have benefitted the fiscal position. Capital expenditure at 31% of the target also showed encouraging trend in line with the Gol's push for infrastructure spending. Gol, expectedly, has kept its H2-FY22 borrowings program unchanged.

India's CPI inflation moderated to four month low at 5.3% in August 2021 led by food which softened to 3.1% (4% in July 2021). Core inflation eased by 10bps to 5.9%. A favourable base and uptick in rainfall in September bodes well for inflation outlook. However, core inflation is likely to remain sticky with an impending increase when contact intensive services sector opens up fully.

Global Market Updates

The US Federal Reserves at its sixth monetary policy meeting of 2021 announced that it would reduce monetary stimulus and signalled earlier than expected interest rate hikes. The central bank said that if the US economy continues to strengthen, it would "soon" dial down the massive asset purchases (of \$120 bn per month) and conclude the tapering process by mid-2022. Although, the Fed stopped short of giving the timing to begin cutting down its monthly asset purchases, it is being interpreted as being as early as November 2021. The forecast for US GDP growth for 2021 at 5.9% has been revised lower from the June outlook of 7%.

The factory output in China contracted for the first time in 18 months in September with PMI at 49.6 while the non-manufacturing PMI climbed back to expansion territory with a reading of 53.2. The fall in manufacturing PMI signals weakness in the Chinese economy, as the country grapples with power shortages and the outbreak of the Delta variant. China's energy problems also risk triggering a renewed surge in world agriculture and food prices. Over the past year, China imported a record amount of agricultural products due to domestic shortage, driving prices and global food costs to multiyear highs.

September was the month for the US dollar as the Fed announcement of tightening of rates post rollback of QE made the currency stronger. Gold witnessed a steady decline in prices during September and dropped to the lowest level in 5 months driven by improvement in risk appetite in the global economies. The price of the precious metal during the month was largely driven by the movement in the US dollar. Crude oil prices rose to a 3 year high in September driven by improved global demand outlook and supply tightness especially in the US.

Outlook

Global economies have not only recovered from the effects of the pandemic but continue to show growth traction, led by faster than expected vaccinations and policy support. As economies are reopening, the bunching up of demand and disruption in supply chain has led to sharp rise in inflation. Despite this, key Central banks continue to view this as transitory and continue their accommodative stance. Biden's infrastructure push and less restrictive immigration policies are positive for global growth and should drive recovery in emerging markets as well. As the delta variant remains a worry, the progress on the pace of vaccinations remains a key monitorable.

On a positive note, the 3rd wave in the UK seems to have already peaked with new cases much lesser than expectations, despite the UK removing all Covid related restrictions since July 19, 2021 (the Freedom Day). The relative severity of the 3rd wave is far lower as indicated by the lower instances of hospitalization and fatalities compared to the 2nd wave. A similar experience has been seen in Israel as well, where a large majority of the population has been vaccinated. These case studies highlight the benefits and efficacy of vaccines.

Though fear of a possible third wave of Covid-2019 looms over India too, the pace of vaccination is encouraging. With the GoI removing regulatory and procedural hurdles, availability of vaccines is improving every month. At the current pace, estimates suggest that India can vaccinate its entire adult population by December 2021.

India has majorly lifted restrictions imposed during the 2nd wave and the pace of economic recovery is encouraging. Gol's slew of targeted measures for the MSMEs, Agri/Rural economy and Lenders and RBI's rate cuts and strong easing measures is supporting the recovery process. Also, the Union Budget for 2021-22, with a pro growth focus and thrust on infrastructure creation is akin to fiscal stimulus. There are sustained signs of revival in the real estate sector, with decadal low interest rates, correction in prices and better affordability. The data of new business registrations indicate a palpable traction in new business registrations.

Declining interest rate environment, massive global liquidity which has started flowing into EMs aided the cyclical recovery in the economy over the medium to long term. The key risk remains consumer sentiment/postponement of demand & a more gradual recovery given the larger number of households been impacted during the second wave and high inflation led by high input prices of metals & crude and supply shortages. However, in the near term with a sharp bounce back, the markets have broadly priced in the normalization. The market is likely to continue with its consolidation given the rich valuations amidst the cautious global cues.

From a more structural standpoint, the pandemic has accelerated the progress on strong reforms

- The cut in corporate tax rates, Gol's focus on Atmanirbhar Bharat and PLI (product-linked incentivisation) would encourage domestic manufacturing and would reduce import dependency and encourage domestic manufacturing.
- New labour laws passed recently is another momentous reform which will propel ease of doing business and manufacturing
- The farm sector reforms and the proposed power sector reforms will help strengthen the rural economy and improve urban infrastructure over the next 5-10 years

MARKET REVIEW

September 2021

Fixed Income Outlook:

India Bond Yields came down by ~3-5 bps in the month of September, mainly on account of the large and growing systemic liquidity surplus (trending around Rs 11 lakh crore) supporting demand in an environment of very low overnight and money market rates. However, RBI later in the month introduced increasing Variable Reverse Repo auctions (current Rs 6 lakh crore) leading to spike in short term rates by 5-10 bps.

India Covid-19 situation seems in control as it has not witnessed the third wave yet, which was widely expected. India active caseload stands at only 0.27 mn as at Sept end. A total of 897.5 mn vaccine doses have been administered till Oct 1 (654.3 mn first dose and 243.1 mn second dose) with vaccination rates improving drastically to 7-10 mn per day in October compared to ~5 mn per day in previous month.

CPI headline inflation eased to 5.3% in Aug-21 from 5.6% in the previous month. The moderation in inflation was led by softening food prices in the month and a strong base from last year. Core CPI (CPI excluding food and fuel) also inched down to 5.8% YoY in Aug-21 from 5.9% in July-21 on account of a moderation in personal care and effects. However, categories like health and recreation and amusement continued to remain elevated. Going forward, slightly weaker monsoon and kharif crops together with the continuous rise in food and commodity prices globally are likely to exert upward pressure on inflation.

Headline WPI inflation for Aug-21 printed at 11.4%, marginally higher than 11.2% recorded in July-21. The is fifth successive month of double digit wholesale inflation and is likely to continue for next few months. The relentless price increase in crude oil in global markets is impacting both wholesale and consumer price inflation. Manufactured goods inflation is high mainly due to high global commodity prices that are increasing as demand pushes forth. This is visible in Fuel and Power Inflation which is at 26.1% and Basic Metals Inflation which is at 27.5%.

Core Infrastructure output (weight of 40.3% in IIP) grew 11.6% in August (July: 9.9%). Cement production increased by 36.3%, natural gas production by 20.6%, coal production by 20.6%, electricity production by 15.3%, refinery products production by 9.1%, steel production by 5.1%. On other hand, crude oil production fell by 2.3%, and fertilizer production declined by 3.1%. Infrastructure output declined by 0.9% in August on a sequential basis.

India Sept (flash) trade deficit spiked to an all-time high of USD 22.9 bn with petro and core imports up. Stripping out petro and precious items, deficit widened to USD 6 bn, widest since Sep'19. September exports increased by 21.4% to US\$33.4 bn and imports increased by 84.8% to US\$56.4 bn. Non-oil exports grew 18.7% (US\$28.5 bn) while non-oil imports increased 57.8% (US\$39 bn). In 1HFY22, exports at US\$197.7 bn increased by 57.7% over 1HFY21 (24.2% over 1HFY20). In 1HFY22, imports at US\$276 bn increased by 82.5% over 1HFY21 (11.3% over 1HFY20). Trade deficit in 1HFY22 was at US\$78.4 bn compared to US\$25.9 bn (US\$88.9 bn in 1HFY20). The quick increase in imports likely reflects stronger than expected recovery trends, as seen in other high frequency indicators.

Fiscal trends remained strong, with Fiscal deficit in 5MFY22 at only 31.1% of FY2022BE. Gross tax collections for 5MFY22 increased by 70% over 5MFY21. Among direct taxes, corporate taxes increased by 160% while income taxes increased by 69%. Among indirect taxes, GST increased by 46%, excise duty increased by 37% and customs duty increased by 136%. On the other hand, Expenditure increased by only 2.3% with revenue expenditure falling by 0.8% and capital expenditure increasing 28%. India announced the H2FY22 Borrowing Calendar and kept the Gross Borrowings numbers unchanged at Rs 5 trn, in spite of the estimated GST compensation loss transfer to States – owing to the strong tax collection trends.

Outlook

We believe the inflation may remain within the RBI target range in H2FY2022. However, sharp growth recovery and sharp increase in global commodity prices and manufacturing inflation may result in inflation overshooting RBI band at times. Also, if the growth recovery momentum continues further aided by the improved vaccination trends, we may see a gradual rollback of monetary accommodation measures by the RBI, which can cause some uptick in yields. While the current yields are somewhat supported by RBI intervention across the yield curve, the space for incremental intervention has considerably reduced given the future outlook on growth and inflation. We are currently underweight in duration versus benchmark.
